# JAVELIN BENCH DESKING SYSTEM

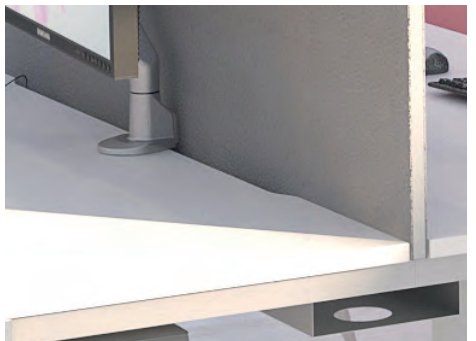

The Javelin bench desking system is a stylish, comprehensive and flexible solution for today's IT dependent office environments. Designed to adapt easily to the ever changing needs of any business, it has a height settable frame from 725mm-810mm future proofing your investment, as well as sliding tops allowing access to the large cable tray for quick and easy cable management.

The simplicity and sophistication of Javelin's design suits a wide range of interiors and office environments. Available with a range of worktop sizes, shapes and finishes it allows for flexible workspaces that meet the needs of organisations and the individual.

The deep cable trays can accommodate large quantities of electric and data cables. Individually fused plug and play electrical four way blocks enable quick installation without the need for a qualified electrician.

## FEATURES

- Height settable legs to suit people of all heights
- IT friendly with under desk concealed cable management
- Sliding desk tops for simple installation of electricals and data
- Unique and stylish design with colour enhanced features

## AUTONOMY PRO ELECTRIC SIT/STAND

The Autonomy Pro height adjustable desk helps keep you active at work or in the home office. Raise and lower the desk from 640mm–1300mm at the touch of a button- one of the largest variable movements on the market.

The digital display and controller is equipped with an up and down button, a home button set at 720mm and two programmable memory set buttons. The controller operates the movement of the three part telescopic legs at a rate of 30mm per second. The Autonomy Pro desk can lift evenly up to an incredible 130kgs.

The safety features include an anti-crush sensor which switches off the control when an obstruction is detected. There are no exposed moving parts as there are two independent motors (one inside each leg).

### FEATURES

- Evenly lifts up to 130kgs at a rate of 30mm per second
- Three part telescopic leg for extended range
- Anti-crush feature
- No exposed moving parts
- Two programmable memory set buttons
- 'HOME' button set at 720mm
